

Messages & Inquiries in the POS

From a new lead to a paid order, booking, ticket or project without leaving Messages: operator patterns, core messaging controls, a four-state recovery model, the customer cards, the secure checkout, the operator on a phone, and seven connected prototypes. Version 2 applies the 10 September audit: one fixture set (\$600 order · \$1,350 / \$405 / \$945 appointment · \$18,000 / \$6,000 offer), separate conversation, opportunity and per-record states, and a retry that never charges twice. Sample business Casa Nube, Centro, MXN.

127 screens

Tablet 1194 × 834 · portrait 834 × 1194 · phone 390 × 844

49	MC12 Channel without cards (SMS)
50	MC13 Change request → moved
51	MC14 Talent view · the assignment arrives

Messages in POS · operator patterns (MS)

Messages is one destination in every POS mode: same rail slot, same unread count, same thread; the mode changes only what the commerce panel offers. Every thread shows three separate things: the conversation state (needs reply · awaiting customer · resolved; unread is an indicator, not a state), an optional opportunity (gathering details · offer sent · awaiting acceptance · accepted, awaiting deposit · won · lost — shown only when an inquiry exists) and one chip per linked record with that record's own payment and fulfilment state. A resolved thread never cancels a record; a paid order never resolves a thread. Sample business Casa Nube, Centro, MXN; today Thu 10 Sep. Operators Ana Torres and Luis Peña; stylist Dani Cruz. Order #1203 = \$600 (pay by 19:15, pickup 19:40); appointment AP-2041 = \$1,350, deposit \$405, balance \$945, 2 h 35; offer v2 = \$18,000, deposit \$6,000.

03	MS01 Rail entry, unread, discreet toast during a payment
05	MS02B Focused thread · inbox and panel collapsed · Actions menu
07	MS04 No profile · progressive capture · guest order
09	MS05B Wrong link discovered after an order exists
11	MS07 Send options picker
13	MS09 Send times · phase model
15	MS11 Create or link · several records on one conversation
17	MS13 Offer sent · current state and actions · versions collapsed
19	MS15 Paid · what is owed now · history behind a disclosure
21	MS17 Post-purchase change · exact policy check

04	MS02 Inbox · list, thread, essentials panel
06	MS03 Inbox · empty · no results · failed to load
08	MS05 Match existing · three levels
10	MS06 Assign the conversation owner
12	MS08 Sent result · customer selection · shared draft
14	MS10 Who performs · resources · acceptance by relationship
16	MS12 Offer builder from the conversation
18	MS14 Collect for the appointment · deposit / full / none
20	MS16 Follow-up queue · close as lost
22	MS18 Concurrent edit · precise diff · duplicate · permission

DESIGN NOTE Both side columns collapse to a rail. Every commerce action (send options, create or link, request payment, attach, note, reminder) lives in one labelled Actions control beside the composer.

The image displays a mobile application interface for a messaging system, presented in three panels to show different states.

On the far left is a vertical sidebar with a light gray background. At the top, it says 'MODE Counter' with a dropdown arrow. Below are icons and labels for 'Sell', 'Orders' (with a red badge '5'), 'Receipts', 'Cash', 'Issues' (with a red badge '2'), 'Messages' (with a red badge '3'), and 'Lock'. At the bottom is a 'Workspace' button with a back arrow icon.

The top of the app has a header. On the left, it says 'Messages' and 'States'. On the right, there are two dropdown menus: one for location showing 'Centro' and one for user showing 'AN Ana · Drawer 1'.

The three main panels represent different states of the 'Messages' screen:
1. **Left Panel (No conversations yet):** Features a light gray background with a faint envelope icon. The text reads 'No conversations yet' followed by 'Customers reach you here from the website, the booking page, table QR codes and your public profile.' and a 'Share your booking link' button.
2. **Middle Panel (No results for "tomas navaro"):** Features a light gray background with a faint magnifying glass icon. A search bar at the top contains 'tomas navaro'. The text reads 'No results for "tomas navaro"' followed by 'Search covers names, subjects, message text and order or booking numbers you may see.' and a 'Clear search' button.
3. **Right Panel (Could not load messages):** Features a light gray background with a faint warning triangle icon. The text reads 'Could not load messages' followed by 'Connection dropped at 18:44. Drafts you typed are kept on this device.' and a 'Try again' button.

DESIGN NOTE Three states, three actions. A failed load keeps typed drafts on the device.

Marcos Ruiz · marcos@...

Different phone · similar name only

New client · Marco

Create a record with the name and phone from this chat

WHAT LINKING DOES

Link this conversation to Marco Ruiz

Internal · the thread shows his name and history to your team

Confirm it is really him

Ask a detail only he knows, or verify by SMS code · needed before showing him his past orders

Give him access to his records

Only after confirmation · receipts, bookings, balances

Cancel

Link to Marco Ruiz · internal

DESIGN NOTE Linking (internal, shows history to staff) ≠ confirming identity (a known detail or SMS code) ≠ granting the customer access to their records. A phone match and a name-only similarity are different choices.

Change the linked customer

This conversation and order #1203 are linked to Marco Ruiz (client since May).
If that is wrong:

Conversation

Re-linked to the new record · every message kept

Order #1203 · paid \$600

Stays paid · buyer changed to the new record · receipt re-addressed

Marco Ruiz's history

Nothing from this chat is kept on him · nothing copied to the new record

Audit

"Ana changed linked customer · 19:04 · reason"

☒ New client · Marco (this chat)

Name and phone from the conversation

☐ Another existing client...

Search

Reason

Wrong match on a shared phone number

Cancel

Change linked customer

DESIGN NOTE Re-linking shows the impact first: the conversation moves, the paid order keeps its payment and changes buyer, nothing from this chat stays on the wrong person, and the change is audited with a reason.

Marco Ruiz · order #1203

< Back to sale #1188 · \$485 · 3 lines

Luis changed draft #1203 while you were editing

	Previous	Luis saved 18:51	Your change
Items	3 pizzas	+ Garlic bread \$60	—
Pickup	19:40	19:45	19:40
Total	\$600	\$660	\$600

Result if you keep both: 3 pizzas + garlic bread, pickup 19:45, \$660. Marco chose 19:40 — he must review before paying.

Keep Luis’s version · 19:45 · \$660

Keep 19:40 · ask Luis

Order already created

Luis created **order #1203** from this conversation at 18:53 and requested payment. Your Review would have made a second order.

Open #1203

Create a separate order...

Not allowed · request payment

Your role can send options and build drafts. Payment requests need a cashier or manager.

Ask for approval

Hand to Luis · cashier

Core messaging controls · recovery model · portrait tablet

The controls a real inbox needs: start a conversation, internal notes, attachments, delivery states, drafts, handover, resolve and reopen, search, reminders. Recovery is a model, not one screen: “payment confirmed, order saved, kitchen delivery failed”, “payment confirmed, finalization failed”, “payment result unknown” and “paid but the promised time is gone” are four different situations with four different actions, and a retry never charges again. A basket that changes after checkout started is version-locked. Agency journeys get their own recovery cases.

24	MS19 Recovery model · four situations, four actions
26	MS20 Basket changed after checkout started
28	MS22 Internal note composer · attachments
30	MS24 Resolve · reopen · hand over
32	MS26 Reminders · edit, cancel, failed, auto-cancelled
34	MS31 Portrait tablet · Messages beside an active payment

25	MS19B Retry in progress · repeated failure · resolved
27	MS21 New conversation · customer and channel
29	MS23 Delivery states · draft recovery · new messages · reconnect
31	MS25 Search results · conversations and records
33	MS30 Agency recovery · failed deposit · talent declines · expired · amendment conflict

Messages · Recovery

Marco Ruiz · payment 18:58 · four different situations

< Back to sale #1188 · \$485 · 3 lines

Payment confirmed · order saved · kitchen delivery failed

Order #1203 exists and is paid. The Hot line station did not acknowledge the ticket (unreachable 18:58). The kitchen may not know.

Retry sending to kitchen

Print ticket at counter

Payment confirmed · order finalization failed

\$600 confirmed by the provider at 18:58; the order record was not written. Recover it from the saved checkout — nothing is charged again.

Saved for recovery: 2 × Margherita (extra basil) · 1 × Diavola (extra mozzarella, no chilli) · \$600 · Marco Ruiz · pickup 19:40 · payment pi_8f2k

Recover order from saved checkout

Open Issues

Payment result unknown

The provider has not answered for the attempt started 18:57. Do not request again; a second link could charge twice.

Check payment status

Continue other conversations

Payment confirmed · promised time unavailable

Paid \$600 for pickup 19:40, but the kitchen closed the 19:40 slot at 18:59 (oven fault). Offer the next slot or an authorized refund.

Offer 20:00 · notify Marco

Authorized refund...

DESIGN NOTE What the operator does depends on what is known: retry a kitchen ticket, recover an order from the saved checkout, check a payment status, or resolve an unavailable slot. None of them requests payment again.

AN Ana · Drawer 1 ▾

< Back to Collect · 3 due

Offer v2 accepted · deposit failed

Laura accepted v2 at 18:52; the \$6,000 deposit was declined by her card. The acceptance stands for 48 h; the project is not created until the deposit clears.

Send a new payment request

Record bank transfer...

Pau declined after Laura paid

Pau declined the design assignment at 19:20. Propose a replacement (Sofi L., same fee basis). v2 names Pau: Laura must approve the change.

Propose Sofi L. · ask Laura

No replacement · offer refund of design line

Version expired before acceptance

v2 expired Fri 11 Sep 23:59 without a decision. Nothing was charged. Revise to v3 with new dates, or close as lost.

Revise → v3

Close as lost

Amendment conflict

Laura accepted v3 on the portal at 13:05 while Ana withdrew it at 13:04. The later action loses: v3 is withdrawn, Laura is told, v2 stays binding.

Re-send v3

Keep v2

DESIGN NOTE

Acceptance stands 48 h if the deposit fails; a decline after payment proposes a named replacement the customer must approve; an expired version is revised or closed; a withdraw/accept race resolves to the earlier action.

Operator on the phone (MM) · follows the live mobile Messages, the workspace mobile kit and the handheld server

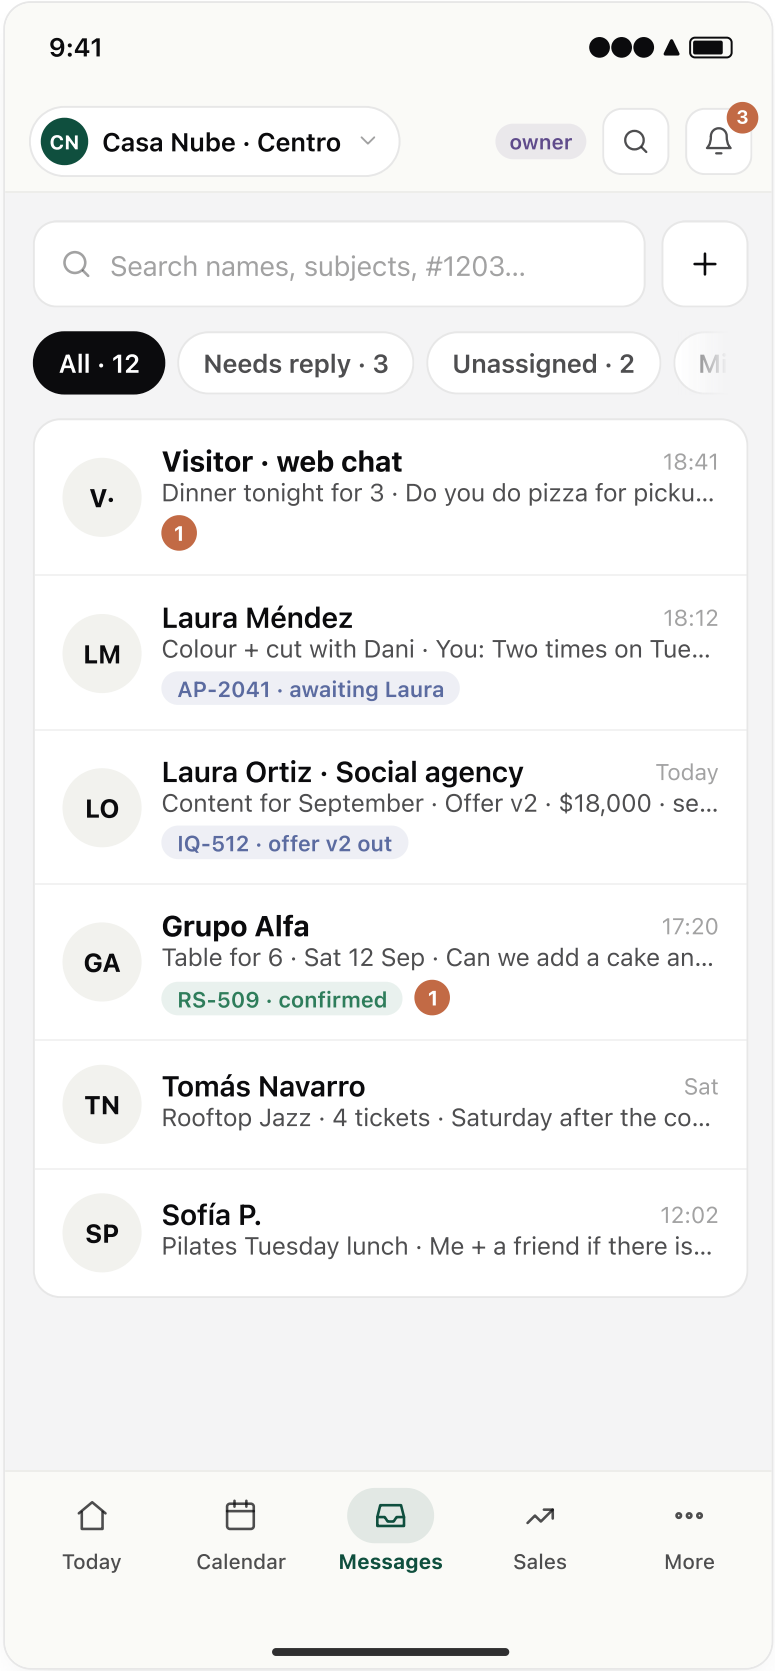

There is no separate POS chrome on a phone. The phone is the workspace app (MW00 tabs + More); POS work appears as handheld flows (T27 tables, MW07 Collect, MW17–MW20 orders). Messages on the phone is the live mobile Messages that already ships (list → thread push, info panel as a bottom sheet, nudge bar above the composer, keyboard avoidance) plus the commerce cards and one Actions control. Proposed: Messages gets its own tab for owner and manager (Today · Calendar · Messages · Sales · More), the professional already has it; a notification opens the thread at the message; the record chips open the existing record screens (MW18 order, MW14 appointment) instead of a second panel; the Collect sheet is MW07's sheet with the phone's real methods (payment link · Tap to Pay hand-off · cash · pay at pickup).

61	MM00 Notification → thread at the message
63	MM02 Thread · record chips · nudge above the composer
65	MM03 Collect sheet · the phone's real methods
67	MM05 Recovery list
69	MM07 Details sheet → existing record screens
71	MM09 Keyboard open
73	MM11 Pizza · send options sheet
75	MM13 Salon · who performs (talent select)
77	MM15 Salon · move the appointment
79	MM17 Agency · lineup (talent select)
81	MM19 Agency · offer sent · current state
83	MM21 Venue · reservation sheet
85	MM23 Venue · tickets · date mismatch
87	MM25 Ops · concurrent edit
89	MM27 Ops · hand over

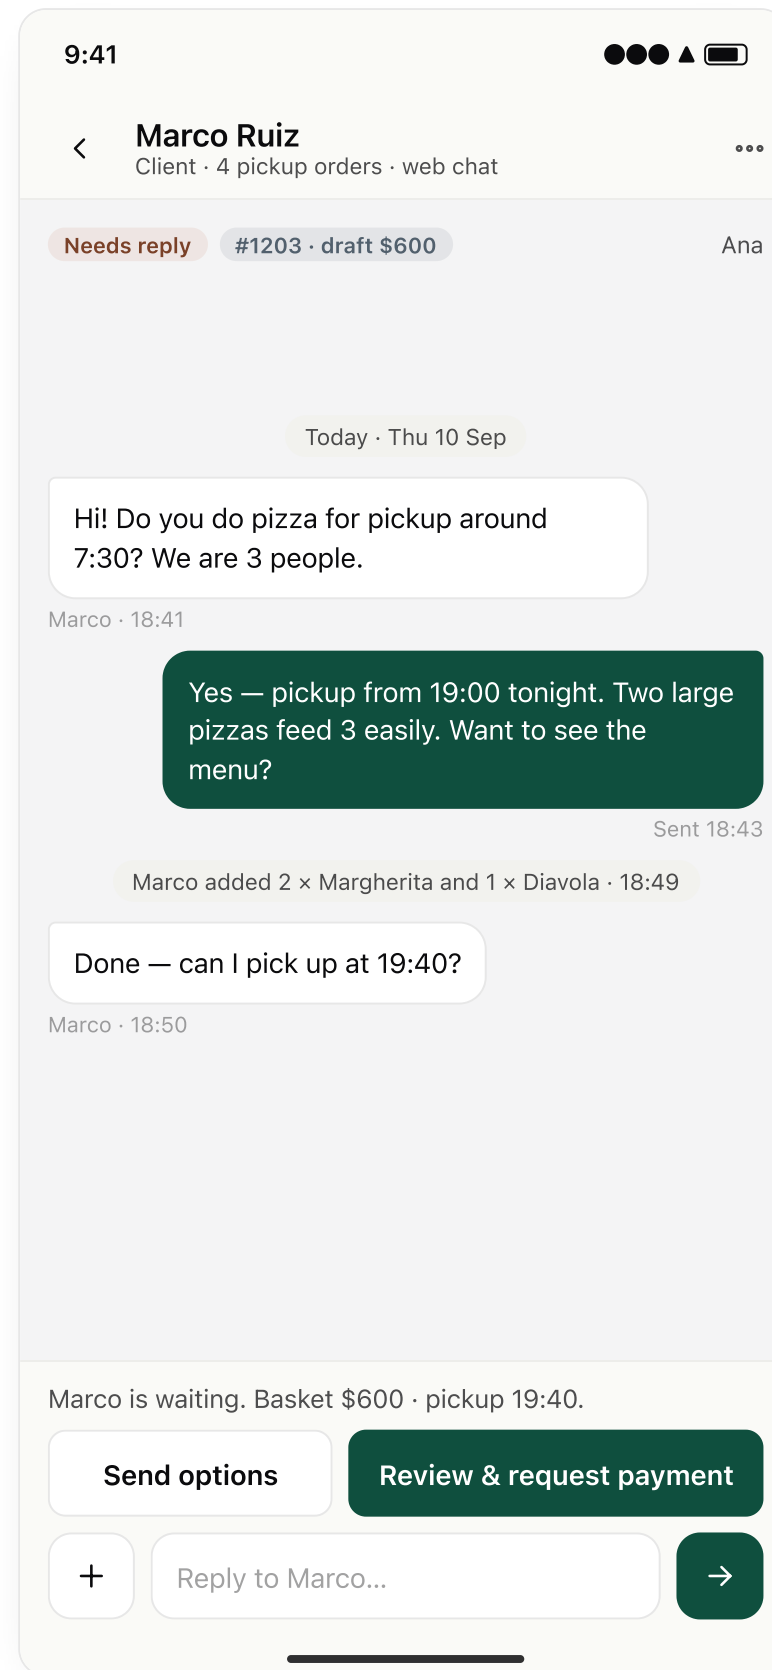

62	MM01 Inbox · Messages as a tab
64	MM02B Actions sheet
66	MM04 Paid · one next action
68	MM06 Today · Messages badge and toast
70	MM08 Handheld server · a guest message on the table
72	MM10 Pizza · is this someone you know?
74	MM12 Salon · send times
76	MM14 Salon · collect the deposit
78	MM16 Agency · named inquiry thread with stage and tabs
80	MM18 Agency · offer builder on the phone
82	MM20 Agency · accepted · awaiting deposit
84	MM22 Venue · class enrol · pass + guest
86	MM24 Venue · create or link
88	MM26 Ops · new conversation
90	MM28 Ops · follow-up queue

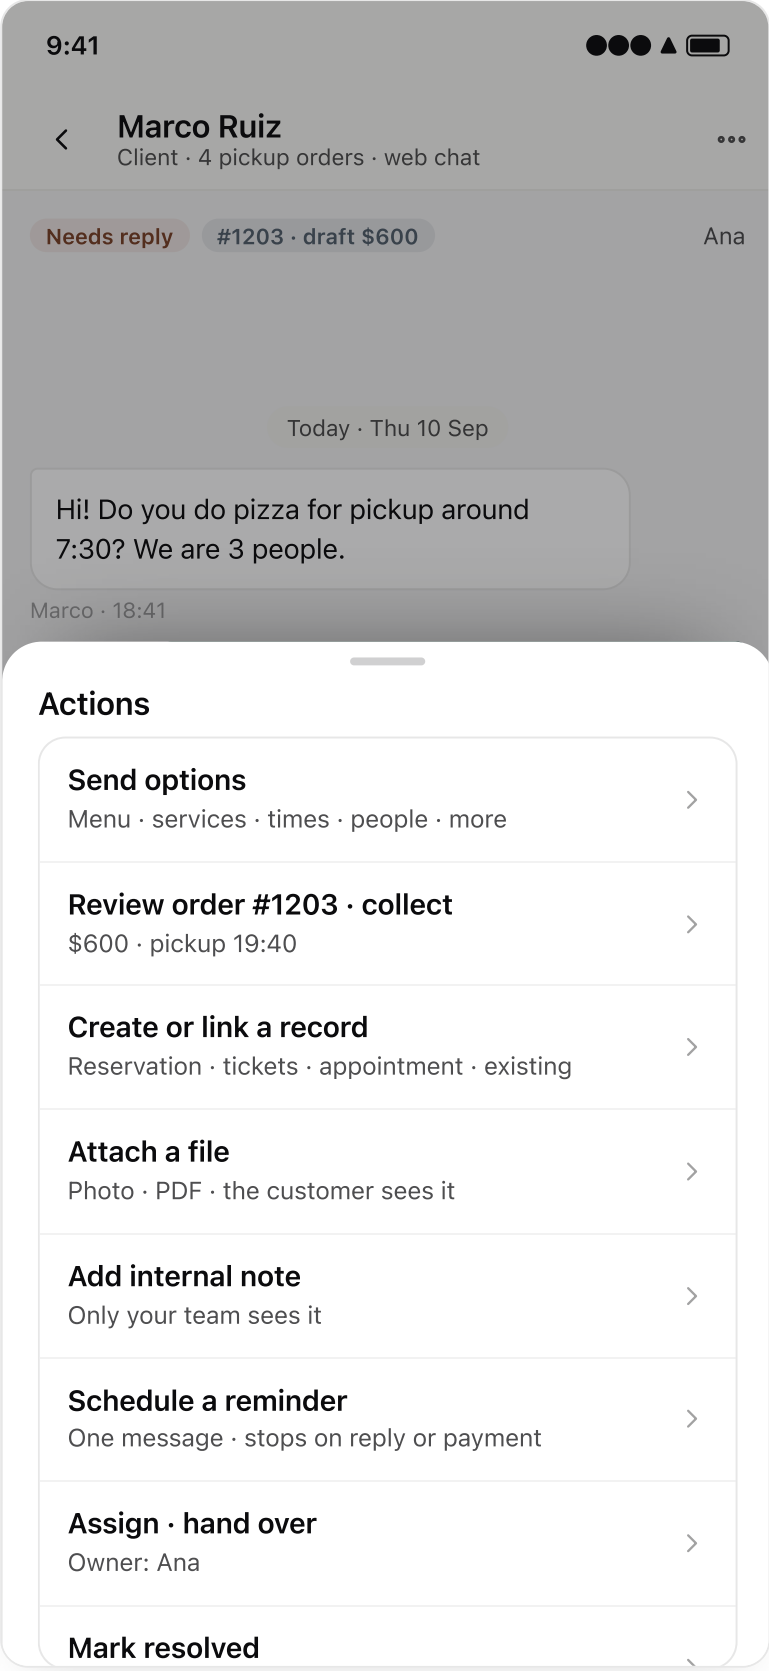

DESIGN NOTE Same rows as MW35; message notifications open the thread at that message; the bell badge counts everything that needs you.

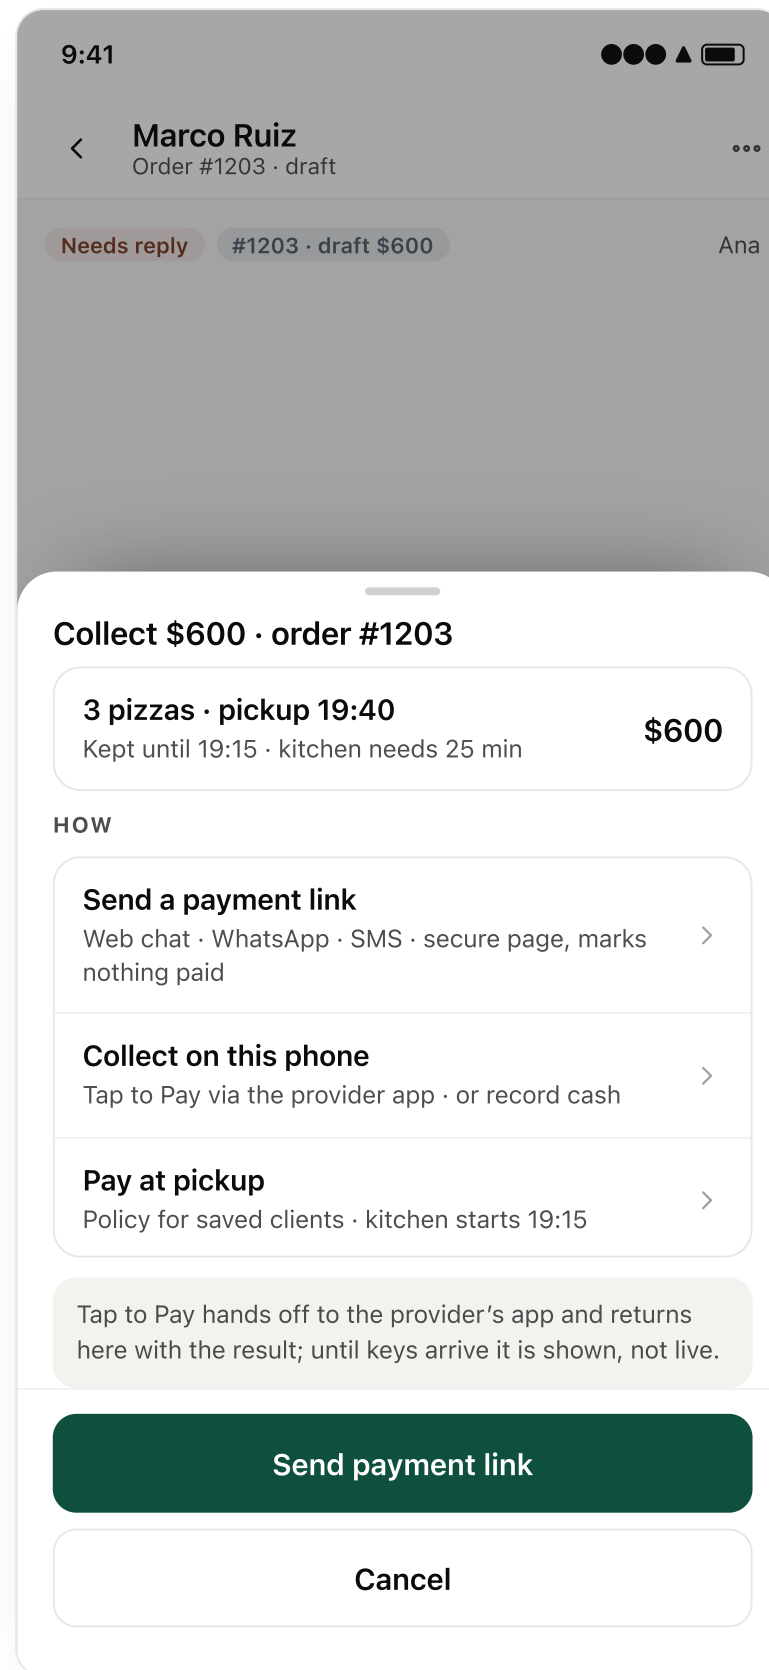

DESIGN NOTE List pane of the live mobile Messages: search, scrolling filters, one row = name, subject, last message, record chip, unread count.

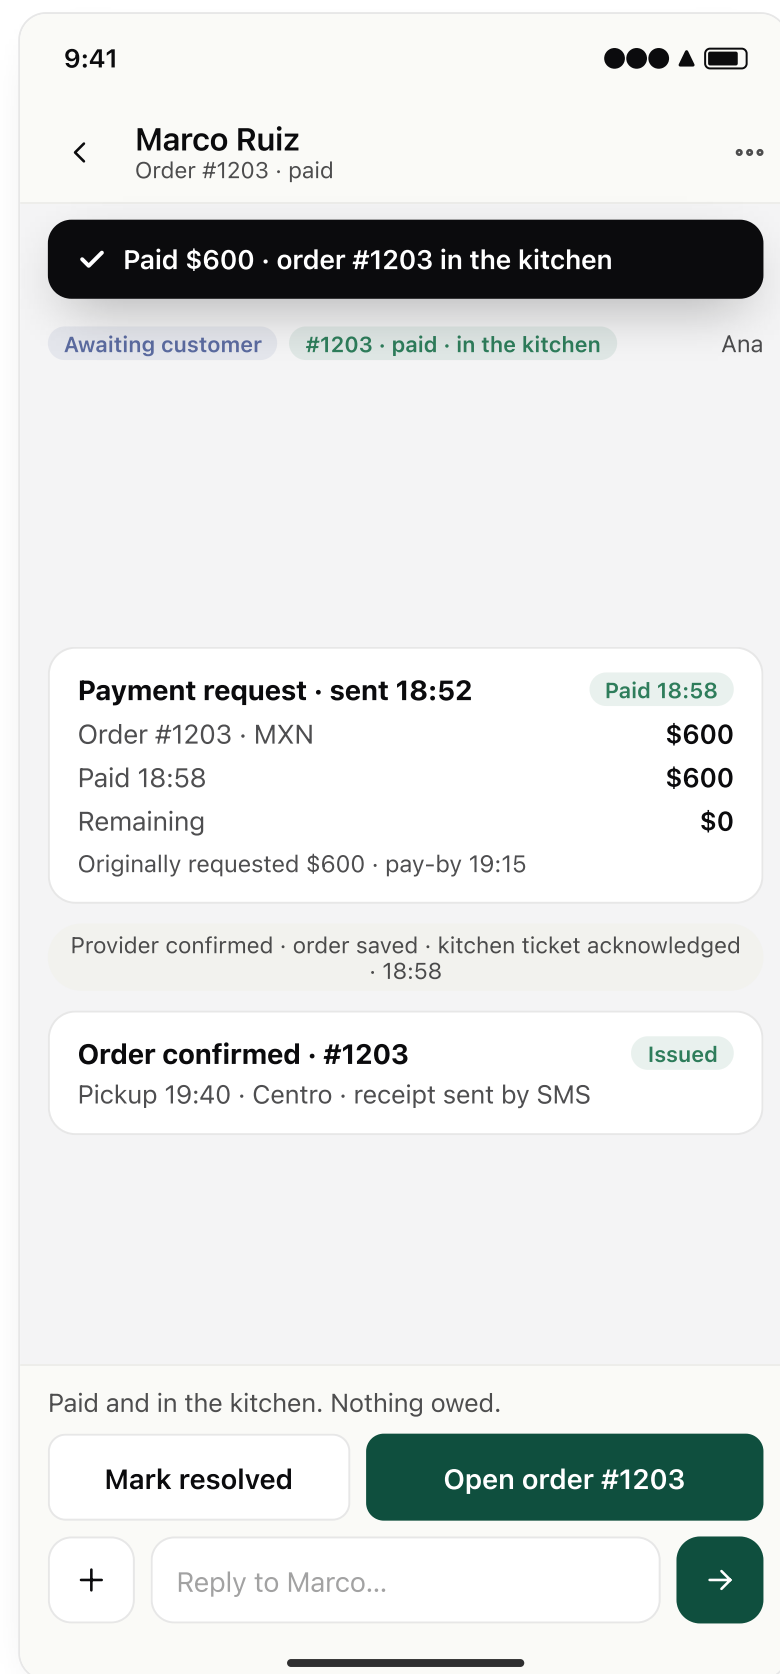

DESIGN NOTE The thread pushes over the list (live slide). Record chips replace the tablet header chips; the nudge bar is the live "Reply to client" bar with the one next action.

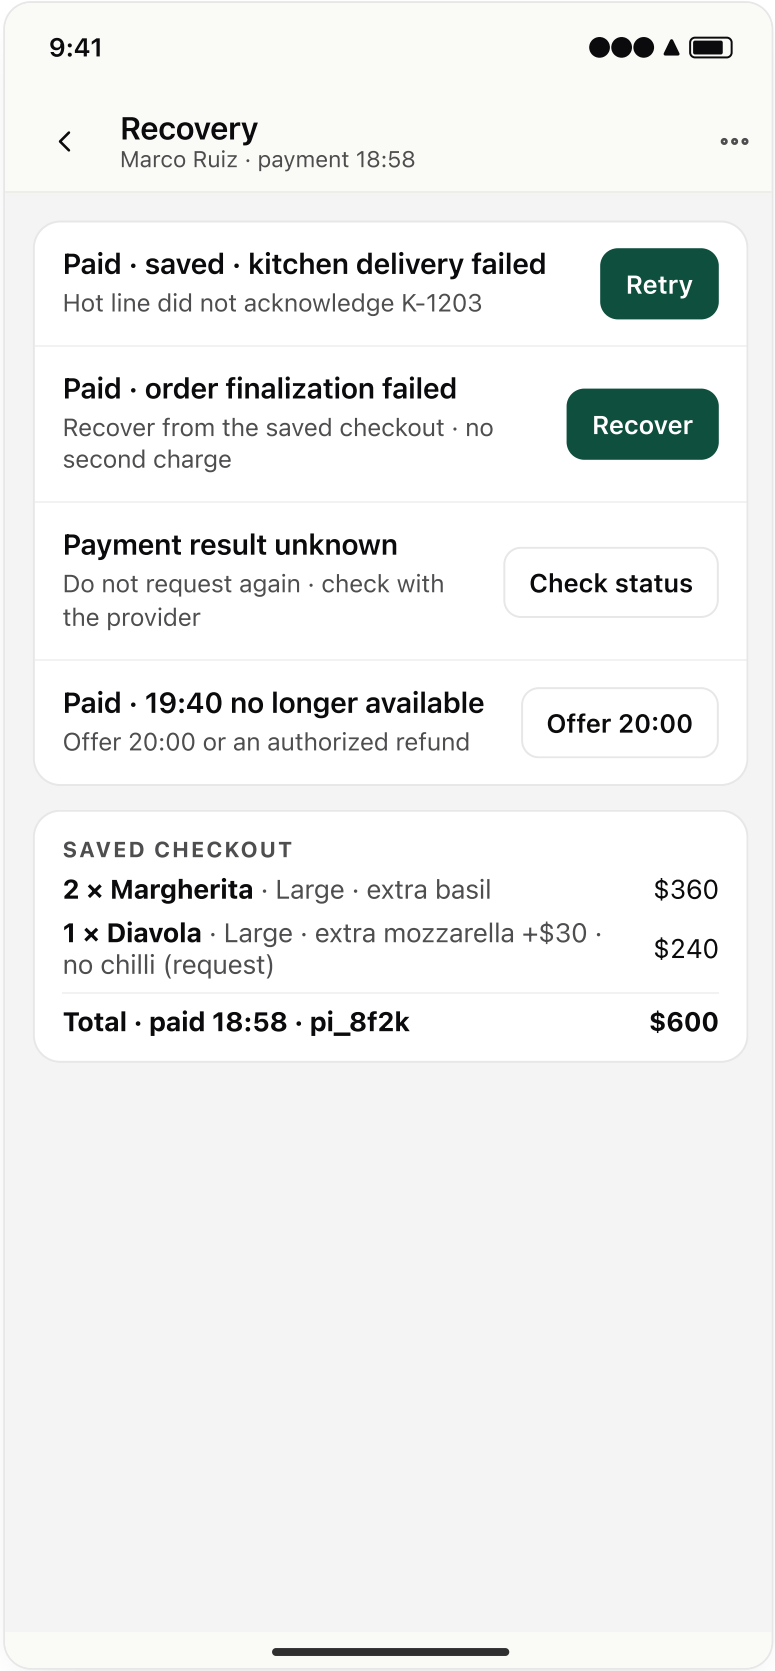

DESIGN NOTE The + control opens the same actions as the tablet Actions menu, as a bottom sheet (live pattern for the info sidebar).

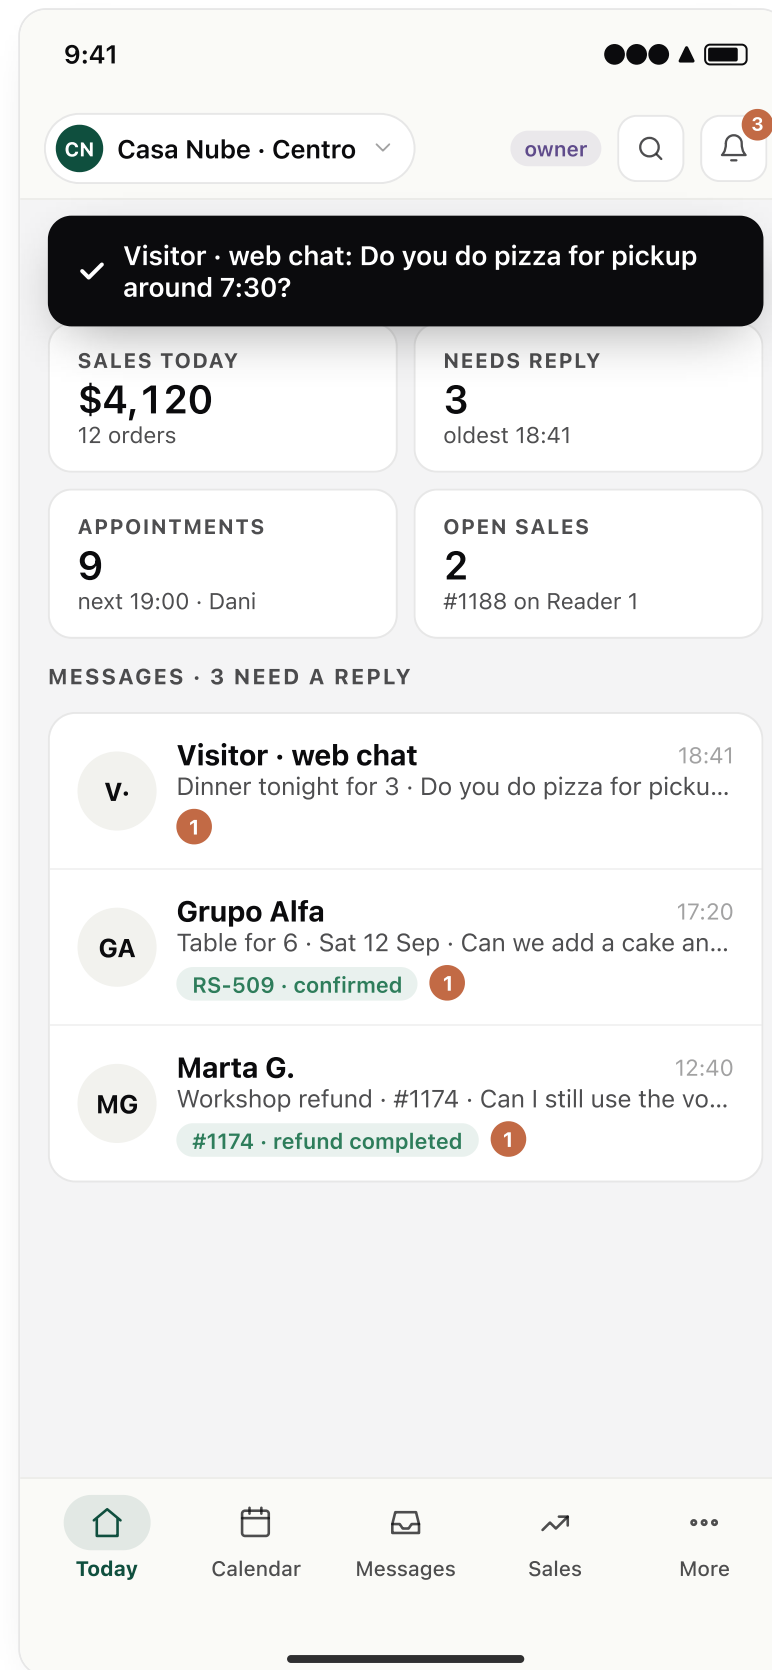

DESIGN NOTE MW07's Collect sheet reused: payment link (primary), Tap to Pay via the provider app hand-off, cash, pay at pickup under the policy. Marks nothing paid by sending a link.

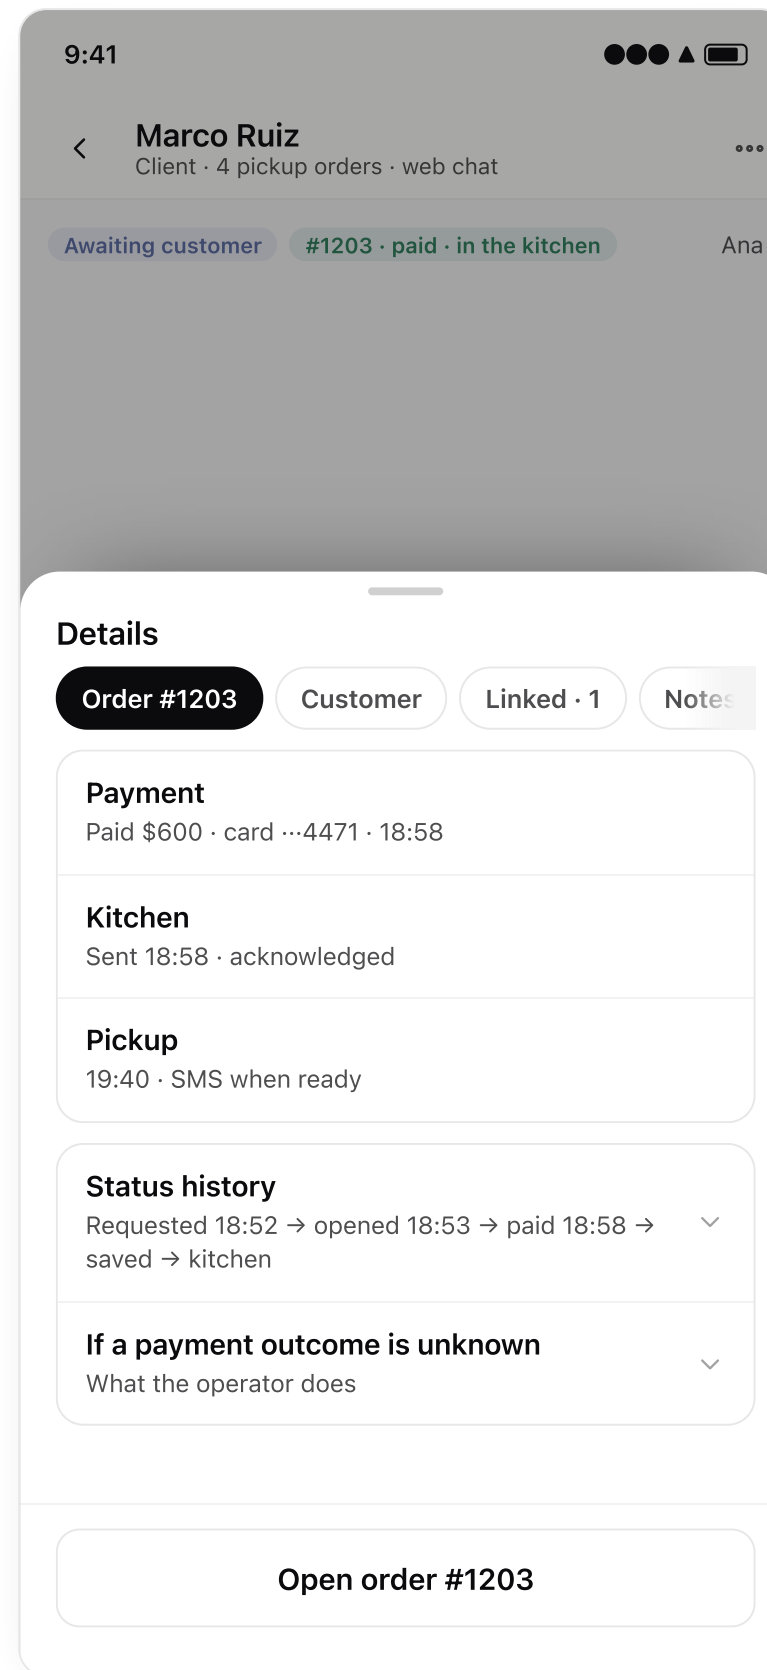

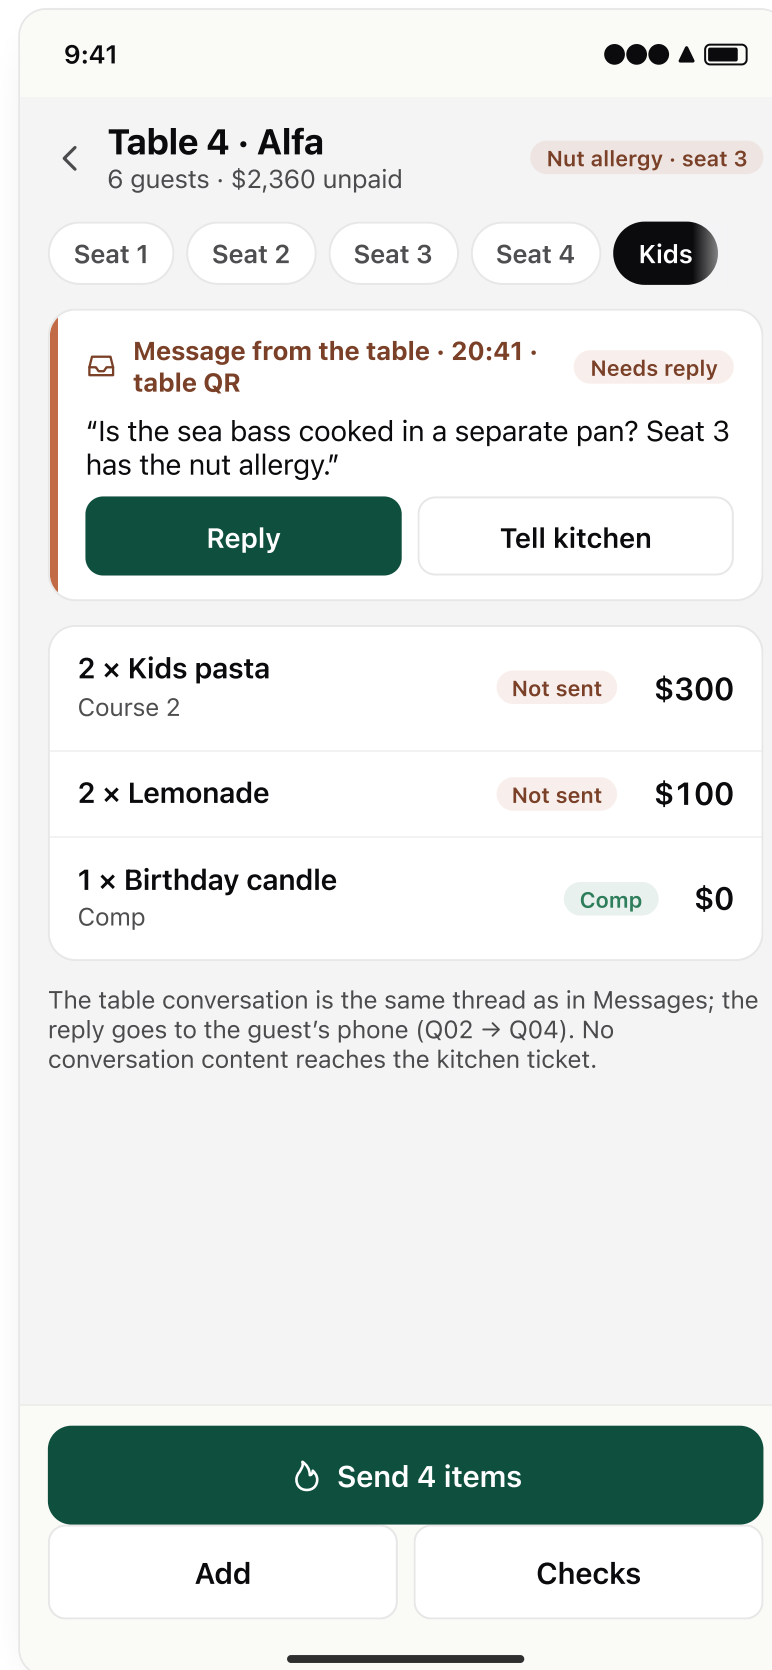

DESIGN NOTE Four situations, one action each; the saved checkout is shown so nothing is retyped.

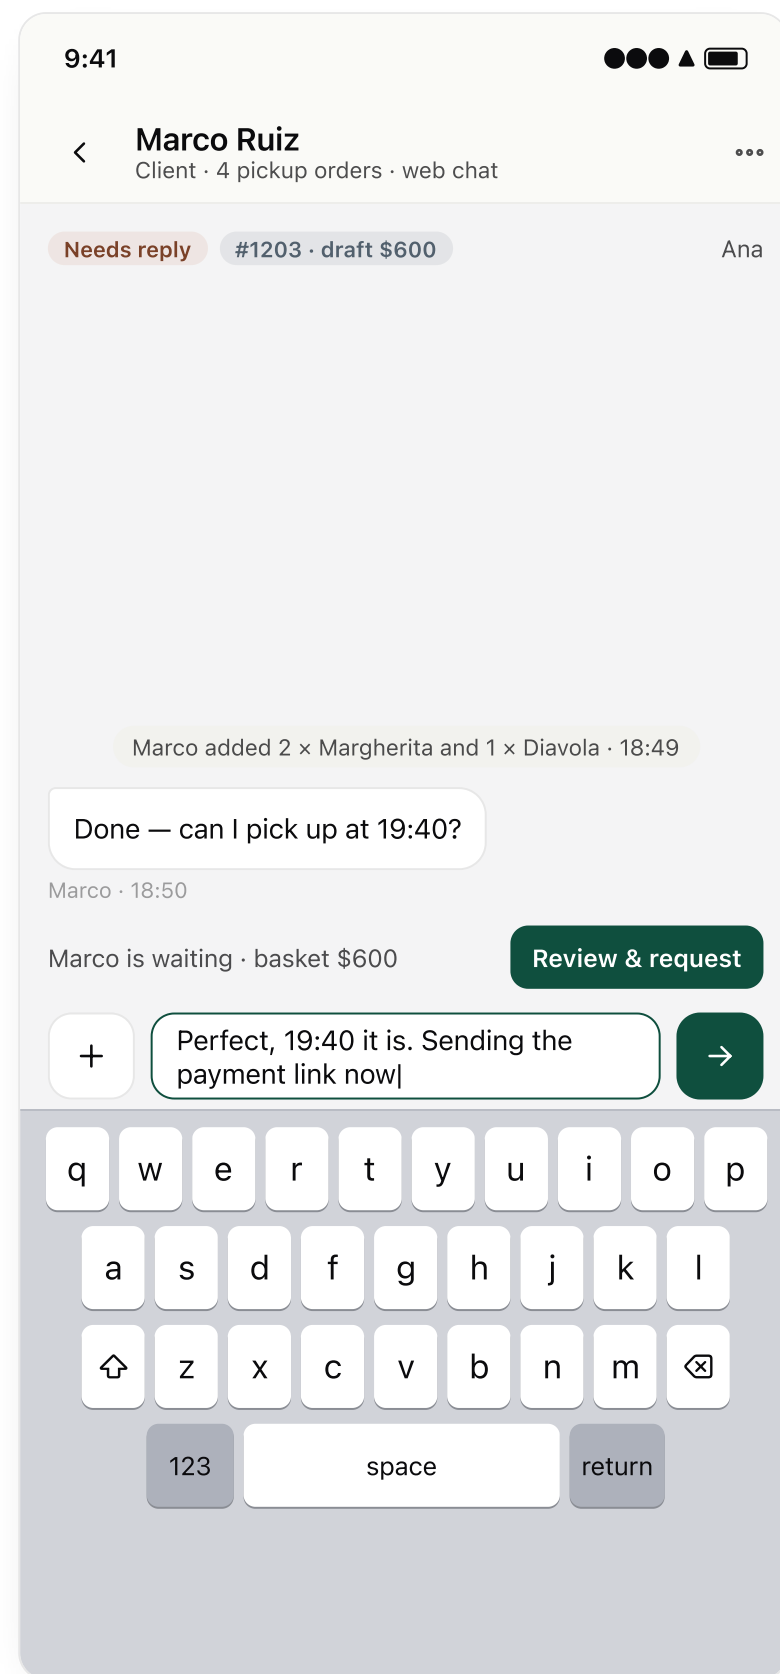

DESIGN NOTE Messages beside other work: tab badge, a "needs reply" block on Today, a toast that opens the thread.

DESIGN NOTE The tablet context panel becomes a bottom sheet (as the live info sidebar does); "Open order #1203" goes to the existing MW18 order detail, not a duplicate.

DESIGN NOTE The composer stays above the keyboard (live keyboard avoidance); the nudge collapses to one line; the thread keeps the last message visible.
